

Zhu Kezhen Distinguished Lecture Series (9)

Summary of Prof. Cooperman's Visit to ZheDa

Prof. Cooperman visited Zhejiang University from July 6 to July 9. He presented two formal lectures for faculty and students of Zhejiang University: (a) the dynamics of protein synthesis (on July 6), and (b) Ribonucleotide Reductase: a chemotherapeutic target (on July 8). He also visited three campuses, the James D. Watson Institute of Genome Sciences and the Department of Chemistry of Zhejiang University, and talked more informally with students and faculty during his stay in Hangzhou.
